

DESCRIPTION FOR THE "FUNDAMENTALS OF PROGRAMMING" PRACTICE SESSION, FALL 2025/2026

Júlia Goldmann

University of Szeged, Szeged, Hungary

In the first semester of the 2026/27 academic year a new course, the Fundamentals of Programming Practice Session was introduced alongside the existing Fundamentals of Programming Lecture and Laboratory in the in Computer Science BSc program at the Institute of Informatics, University of Szeged. This course complements the existing Fundamentals of Programming Lecture and Laboratory sessions. It is designed for first-year students to master programming basics and core algorithms using the Python language. This article presents the introduction of this course, its underlying concept, and the experiences and statistical results from its first semester.
